BRIAN KIMUTAI KOCHILINYANG

CYBERSECURITY ANALYST | SOC | DIGITAL FORENSICS | INFRASTRUCTURE SECURITY

Eldoret, Kenya • +254 722 475 396 • kimutaibrian.kb@gmail.com
LinkedIn: linkedin.com/in/kimbriankim • GitHub: github.com/Kimutai43 • Portfolio: kimutai43.github.io/Portfolio/

PROFESSIONAL SUMMARY

Cybersecurity and digital forensics practitioner with hands-on experience supporting security operations, endpoint protection, IT infrastructure, incident investigation and technical support. Familiar with SIEM and EDR workflows using Splunk, Microsoft Defender and SentinelOne, alongside endpoint management with Microsoft Intune, firewall administration, access controls, Windows and Linux administration. Builds practical security tools and automation using Python and Bash, with an evidence-led approach to investigation, documentation and remediation.

CORE TECHNICAL SKILLS

Security Operations: SIEM monitoring, alert review and triage, log analysis, threat intelligence, incident escalation, investigation documentation

Endpoint & Identity Security: Microsoft Defender, SentinelOne, Microsoft Intune, MFA, password policies, access controls, Active Directory and Group Policy

Infrastructure & Systems: Windows, Ubuntu Server, Kali Linux, Microsoft 365, Google Workspace, VPN, firewall administration, patching, backup restoration, VirtualBox

Network & Forensics: TCP/IP, Nmap, Wireshark, network troubleshooting, digital evidence handling, Autopsy, malware analysis fundamentals

Security Development: Python, Bash, JavaScript, FastAPI, Flask, SQL, Git, security automation, vulnerability assessment fundamentals

PROFESSIONAL EXPERIENCE

Security Engineer (Volunteer) | Fortitrust Solutions

Apr 2026 – Present • Eldoret, Kenya

- Support security operations activities involving monitoring, threat intelligence, detection engineering and incident-response workflows.
- Administer and support Ubuntu Server environments; contribute to uptime monitoring, infrastructure security and technical troubleshooting.
- Work across Active Directory and Group Policy, Microsoft 365, cloud infrastructure, virtualization and VoIP environments.
- Assist with customer support and SLA case management, technical demonstrations, lead qualification and accurate CRM documentation.

IT & Security Analyst (Industrial Attachment) | Kenya Revenue Authority (KRA)

Jan 2026 – Mar 2026 • Eldoret, Kenya

- Supported security monitoring and log review using Splunk, with endpoint protection and investigation workflows involving Microsoft Defender.
- Worked with Microsoft Intune endpoint security policies, Google Workspace administration, firewall administration and access-control activities.
- Assisted with backup restoration, endpoint configuration, VPN setup, static IP assignment, access-point support and technical documentation.
- Installed and configured Windows and Linux environments, business applications and VirtualBox; supported laptop imaging and hardware/software troubleshooting.

IT Support Technician (Security Focus) | Lendplus Credit Limited

Sep 2024 – Dec 2025 • Kenya

- Delivered Tier 2 technical support and supported Windows/macOS device onboarding through Microsoft Intune and manual configuration.
- Supported Microsoft 365 accounts, permissions and access controls; monitored endpoint security alerts using SentinelOne and escalated suspicious activity.
- Applied MFA and password-policy controls; supported Wi-Fi access controls, patching, antivirus protection, backups and endpoint troubleshooting.
- Supported CCTV and alarm systems, user assistance, service documentation and day-to-day IT operations.

PROJECTS & TECHNICAL DEVELOPMENT

Spyrax Linux Sentinel | Bash, Python, Kali Linux

Developing a modular Linux security-auditing toolkit. Current work includes reconnaissance, user auditing, SSH configuration review, authentication analysis, a findings engine and HTML/TXT/JSON reporting. Project is actively being developed and validated.

BashVault | Bash, Linux

Built a backup and restore utility featuring dry-run and explicit apply modes, compressed archive handling and archive-content verification.

SQL Injection Detection Tool | Python, FastAPI, JWT

Developed an application-security project combining request analysis, authentication, a findings dashboard, anomaly-detection functionality and PDF reporting.

Phishing Email Detector | Python

Public project focused on examining suspicious email indicators and phishing-related patterns. Implementation details are available in the public repository.

Academic & Independent Python Development | Zetech University / Personal Projects

Apply Python programming, debugging, API integration and secure-development concepts through academic and independent project work. This is project development, not formal employment.

EDUCATION

Bachelor of Science in Cybersecurity & Forensics — In Progress
Zetech University • Ongoing • Expected completion: 2028

Diploma in Cyber Security and Forensics — Completed
Zetech University • 2020–2022

CERTIFICATIONS & TECHNICAL TRAINING

Cisco CyberOps Associate • CCNA • Cisco Python for Automation • Certified Ethical Hacker training (Cyber Shujaa) • Cyber Threat Management • Network Defense • Endpoint Security • Digital Forensics & Incident Investigation • Malware Analysis • ISO/IEC 27001 training • Certified LLM Security Expert training • ICDFA membership.

TOOLS & PLATFORMS

Splunk • Microsoft Defender • SentinelOne • Microsoft Intune • Microsoft 365 • Google Workspace • Ubuntu Server • Kali Linux • Windows • VirtualBox • Wireshark • Nmap • Autopsy • Python • Bash • FastAPI • Flask • Git

PROFESSIONAL INTERESTS

Security operations and incident response • Digital forensics and investigation • Threat detection and analysis • Endpoint and infrastructure security • Linux security auditing • Security automation and AI security.
